PRATHIBHA S

Bengaluru, Karnataka | +91-9483221185 | prathisdeo@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Software Engineer with experience in developing scalable full-stack applications, RESTful APIs, and backend services using Java, Spring Boot, Spring MVC, and Golang. Strong foundation in OOP, SQL, and software engineering principles, with hands-on exposure to modern web technologies. Passionate about building reliable, scalable applications and continuously learning modern technologies

TECHNICAL SKILLS

Languages: Java, Golang, Python (Basic level)

Frameworks: Spring Boot, Spring MVC, Fiber (Go)

AI & ML: Machine Learning Fundamentals, Regression, Classification, Decision Trees, Random Forest, Logistic Regression, Pandas, NumPy, Matplotlib, Scikit-learn

Backend & APIs: RESTful API design & development, MVC architecture, CRUD operations, API testing (Postman)

Databases: SQL

Web: HTML, CSS, JavaScript

Tools & Practices: VS Code, Eclipse, Postman, MySQL Workbench, Git & GitHub

PROFESSIONAL EXPERIENCE

Software Engineer | CACHATTO India Pvt Ltd, Bengaluru *Feb 2026 – Present*

- Build and maintain backend services in Golang using the Fiber framework within a product-based engineering team, contributing to features used in a live production application.
- Design and implement RESTful APIs to support core application functionality and evolving client requirements, working from requirements through to deployment.
- Collaborate with the engineering team to debug production issues, improving application stability and performance.
- Manage version control and team collaboration workflows using Git and GitBucket, following branching and code review practices.

Java Full Stack Development Intern | JSpiders, Bengaluru *Oct 2025*

- Built responsive web applications using Spring Boot and core web technologies, covering both backend services and frontend integration.
- Gained hands-on training in Java full-stack development, REST API fundamentals, and backend integration patterns.
- Applied MVC and backend integration concepts while working on hands-on application development and feature implementation.
- Strengthened debugging, testing, and problem-solving skills through practical development exercises and application iterations.

Web Development Intern | Super Mentor, Ballari *Feb 2025*

- Developed frontend features for real-world web applications, strengthening HTML/CSS/JavaScript and debugging skills.
- Worked through multiple project iterations to identify and resolve functional issues, improving debugging and troubleshooting ability.
- Applied problem-solving skills while implementing and refining frontend functionality based on project requirements.
- Gained practical exposure to web development workflows and improved code quality through iterative development and issue resolution.

PROJECTS

HR & Employee Assistance Chatbot

- Built an AI-powered HR and employee assistance chatbot to provide conversational support for common employee and HR-related queries.
- Designed backend services using Java to handle user requests, business logic, and communication between application components.
- Integrated conversational AI capabilities to generate relevant responses and improve the user experience for employee assistance.
- Implemented a structured application flow for handling employee queries and delivering automated assistance.

Employee Management System

- Built a Spring MVC-based employee management application to manage employee records through a structured web interface.
- Implemented complete CRUD operations for creating, retrieving, updating, and deleting employee information.
- Applied MVC architecture and layered application design to separate presentation, business logic, and data-handling responsibilities.
- Worked with database operations to persist and retrieve employee records efficiently.

Online Examination System

- Developed a full-stack online examination platform with a MySQL backend for managing users, tests, questions, and examination results.
- Implemented user login and test creation functionality to support the examination workflow.
- Developed automated grading functionality to evaluate submitted answers and generate results.
- Implemented real-time result generation to provide users with immediate examination outcomes.
- Designed the application with frontend and backend components connected through database-driven functionality.

EDUCATION

B.E. in Computer Science and Engineering *2021 – 2025*

Rao Bahadur Y. Mahabaleshwarappa Engineering College Ballari, Karnataka — CGPA: 8.06

Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Software Engineering, Web Development, REST API Development

CERTIFICATIONS

- **Data Structures & Algorithms** — Student-level Certification.
- **C Programming Internship** — Hands-on experience in programming, problem-solving, and logical thinking.
- **AI & Machine Learning** — Certification Course covering Machine Learning fundamentals, data analysis, and model development.
